To begin the alignment of quality measure reporting under the Hospital IQR and Medicare EHR Incentive Programs, CMS is proposing to give hospitals two options to meet FY 2016 IQR reporting requirements for the VTE, Stroke, ED and PC measure sets. These four sets are included in both programs. The proposal states, "Under the Hospital IQR Program for the FY 2016 payment determination, hospitals may choose to either (1) electronically report at least one quarter of CY 2014 quality measure data for each measure in each of four Hospital IQR measure sets (STK, VTE, ED and PC), or (2) to continue reporting all of these measures using chart-abstracted data for all four quarters of CY 2014."
