

GET UP

GET UP focuses on mobilizing patients to return to function more quickly.

Keeping a patient mobile is key to helping them avoid various types of harm. Maintaining a continued emphasis on mobility can assist in the prevention of several harm events, including CAUTI, delirium, falls, HAPU/I, readmissions, VAE and VTE.

There are many resources available at HRET-HIIN.org, including those below, to help your organization address these harm events and engage with the UP Campaign.
